- **Baht 15.1m of non-core 1-time expenses incurred this quarter due to:**
 - M&A related expenses, in particular for the acquisition of Sun Packaging Systems (Sunpack) in the UAE, Baht 6.3m. Sunpack recently closed on the 30th of July '19, cementing TPACs presence in the middle east.
 - Increase in Thailand statutory provisioning for legal severance from 300 days to 400 days (Baht 8.8m).
- Sales volumes in Thailand were slightly slower this quarter compared to our last quarter as a result of some seasonality.
- Overall however Q2'19 has been fairly robust quarter in Thailand supported by the continued turnaround at TPAC Bangna.
- YTD TPAC Thailand Core EBITDA is 16% versus 1H'18, and management feels that with our market leading positioning in Thailand, our teams execution track record, and a healthy market for fully recyclable rigid plastic consumer packaging (TPACs market), TPAC is well placed to capture upside to our earnings.

- For reference, the amalgamation on Sunrise Containers into TPAC India closed in 28 August 2018. Q4'18 was the first full quarter of consolidating TPAC India's earnings.
- TPAC India experienced a weaker quarter in Q2'19 versus Q1'19 as a result of lower volumes and contracted raw material spreads.
- With PET polymer raw material prices dropping suddenly and significantly during Q2, specifically in June some of our customers took a 'wait and see' approach before procuring their packaging, hoping to capture pricing reflective of further price falls.
- Furthermore, some of TPAC India's finished good inventory had to be priced down to reflect the falling underlying polymer prices and this resulted in a margin squeeze.

COMPANY REGISTRATION NO. AND TAX ID : 0107547000575

- Therefore, the combination of slower volumes and a contracted raw material spread have contributed to a lower EBITDA this quarter (compared to previous quarters).
- As a result of the above-mentioned factors, Q2'19 was a slower quarter for TPAC India.
- Importantly however, the fundamentals of the TPAC India's business remain robust and management expects margin contraction as a result of lag pricing to normalize / recover over the course of the year.
- Tax for this quarter is effective at 35%, which is the statutory tax rate in India. Note that In Q1 '19, there was an income tax income in India in accordance with account of recognition of deferred tax assets.
